

IncubatorWarehouse.com's High Torque Cabinet Egg Turner Motor

CAUTION: THIS MOTOR AND ALL IT'S CONNECTIONS CARRY HIGH VOLTAGE POWER THAT CAN CAUSE DEATH AND SERIOUS INJURY. IF YOU ARE UNSURE ABOUT WIRING THIS ITEM PLEASE CONTACT AN ELECTRICIAN

Features

- High Torque (60lbs/in)
- 1 RPM
- Hole in Shaft for easy Turner Shaft Linkage
- Works with IncuStat Advanced & IncuKit XL Advanced
- Incubator Warehouse 1 Year Hassle Free Guarantee
- 110V AC Power

This Egg Turner Motor is perfect for cabinet egg incubator applications, providing very high torque (60 lbs/in) it can easily turn a variety of egg turner designs. The motor is 1 RPM (makes 1 revolution per minute), so it is best used with a timer to prevent overturning your eggs. This motor works great with the IncuStat Advanced & IncuKit XL Advanced because they have built in egg turner timer controls. Motor shaft has a D shape and also a hole through the shaft for easy egg turner linkage.

Wiring Diagram

Simply plug the power wires into the top and middle ports on the connector. It does not matter which of the 2 power wires go into each port.

Note: You can change the motor direction by putting the power wires into the middle and bottom ports (instead of top and middle)
